

Adaptiva OneSite Cumulative Update March 2019

This datasheet provides an overview of the updates provided to OneSite customers in this release. Customers can get more detail in the release notes.

<i>Category</i>	<i>Feature</i>	<i>Benefit</i>
<p>Security</p>	<p>Numerous new and enhanced security capabilities, including:</p> <ul style="list-style-type: none"> • Enhanced FIPS compliance • AES Everywhere • Strong password enforcement • Elliptic-curve Diffie–Hellman key exchange • Folder-level permission support for SCCM collections • Complete driver signing (all drivers co-signed by Microsoft) • Complete binary signing (all binaries signed, including both DLL and executable) • Lockdown of ACLs to Admin and System on all relevant folders and registry paths • Global AD group security (grant Workbench login and permission to global AD groups) 	<p>Scores of security enhancements keep customers ahead of the curve in today’s ever-shifting enterprise security landscape.</p>

<p>Auto-Updating Adaptiva Client</p>	<p>Adaptiva client software can easily be upgraded at scale from any version to the newest version.</p>	<p>Saves administrators time.</p> <p>Improves security and functionality by making it easier to keep all systems on the latest version.</p>
<p>New Dashboards</p>	<p>New dashboards provide deeper insights such as “OneSite Content Push Size vs. V-SAN Space.”</p>	<p>Administrators can work faster and smarter.</p>
<p>Performance Improvements</p>	<p>A variety of additional performance innovations to give you the fastest content delivery capability available. New features include:</p> <ul style="list-style-type: none"> • A new asynchronous protocol that accelerates LAN delivery by up to 20x • Faster large message sends improve scalability in enterprises • Faster P2P policy delivery in enterprise environments 	<p>Key benefits include:</p> <ul style="list-style-type: none"> • Lower impact to client systems • Less impact on server • Faster delivery of enterprise-scale health, compliance, and vulnerability checks and remediations • Faster delivery of software and updates • Greater scalability
<p>Business Continuity</p>	<p>Enhanced support for SCCM high availability.</p>	<p>Administrators have a greater array of high availability architectures to choose from to ensure uninterrupted operations.</p>
<p>Enterprise Administration</p>	<p>Global export and sync of Adaptiva server objects.</p>	<p>Greatly reduces administrator time/effort in an enterprise environment.</p>

Integration	New PowerShell Cmdlet Creator publishes Workflows as cmdlets that can be used by the Adaptiva server or clients.	Allows easy integration of content delivery into any PowerShell-driven business process, task, or application.
Optimizations	The release contains dozens of new optimizations in every area such as improved administrator user experience, new workflows, support for nested SCCM task sequences.	Saves administrators time. Improves delivery success rates. Empowers administrators to extend their leverage of SCCM task sequences.

About Adaptiva

Adaptiva is a leading, global provider of modern endpoint management and security solutions. The company's peer-to-peer technology products, including [OneSite™](#) and [Client Health™](#), empower enterprise IT teams to manage and secure endpoints with unparalleled speed and at massive scale. Adaptiva is self-funded, highly profitable, and growing at a rapid rate. Leading global Fortune 1000 organizations, including T-Mobile, Nokia, HSBC, Walgreens, the U.S. Department of Defense, and the U.S. Department of Homeland Security, use Adaptiva products to eliminate the need for a vast IT infrastructure and automate countless endpoint management tasks. Learn more at <https://adaptiva.com>, and follow the company on [LinkedIn](#), [Facebook](#), and [Twitter](#).
