

## Enterprise IT Security

# Windows 10 & Microsoft System Center

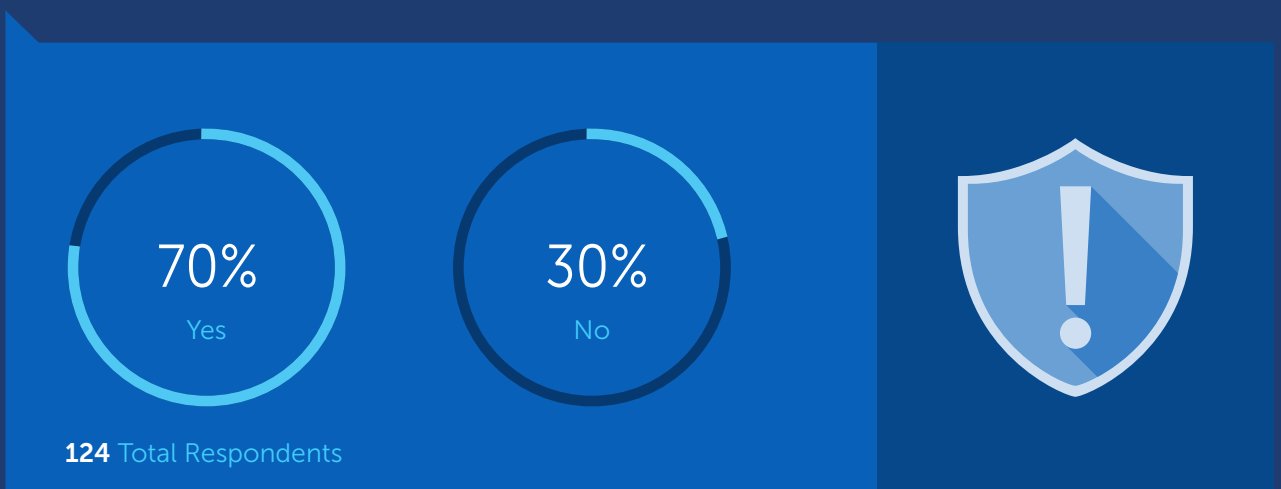

New Adaptiva Survey Finds 70% of Enterprise IT Concerned about Security in SCCM Environments

Adaptiva polled 186 global enterprise IT professionals on the security of Microsoft products Windows 10 and Microsoft System Center Configuration Manager (SCCM).

**Key Takeaways:** Respondents were concerned about potential vulnerabilities in their SCCM environment but were optimistic that a move to Windows 10 could make their enterprises more secure. Many respondents had experienced security breaches in their organizations and had used SCCM as a powerful IT tool to respond to those attacks. An overwhelming majority of respondents planned to conduct security audits this year.

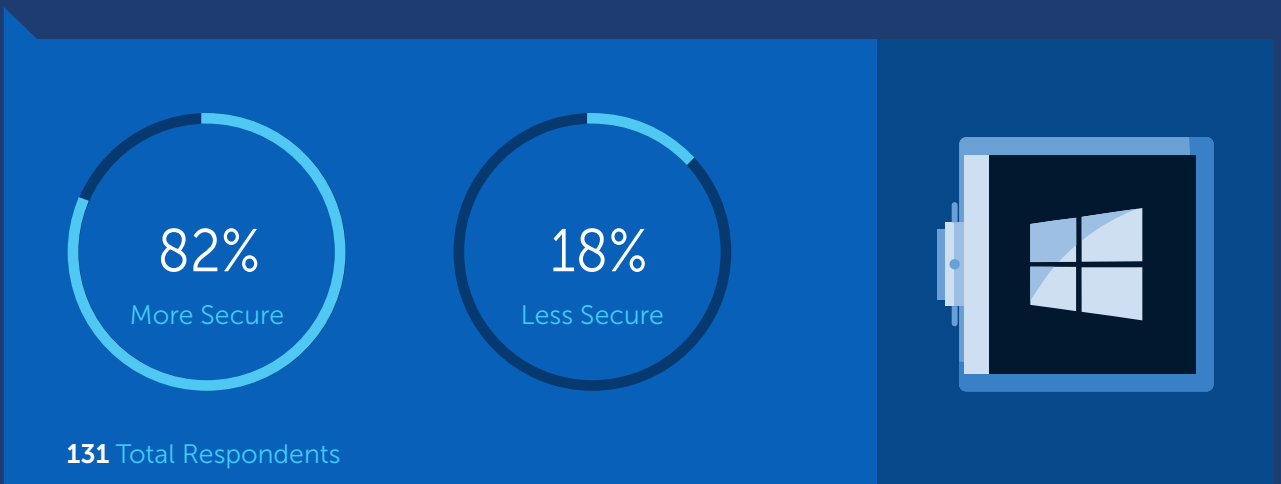

Are you concerned about potential security vulnerabilities in your Microsoft SCCM environment?

01

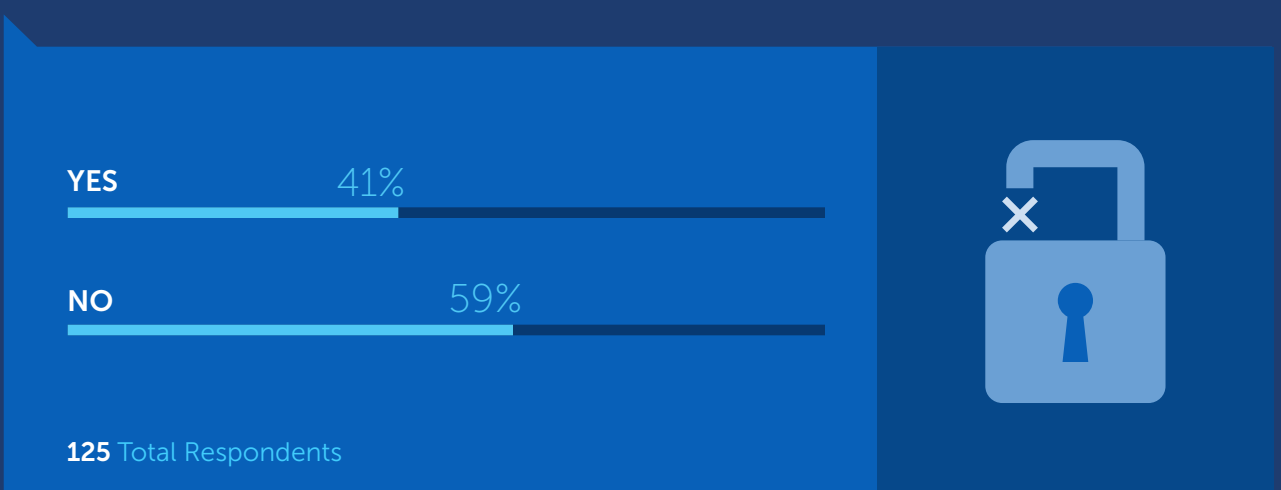

Do you think a move to Windows 10 would make your company more secure or less secure?

02

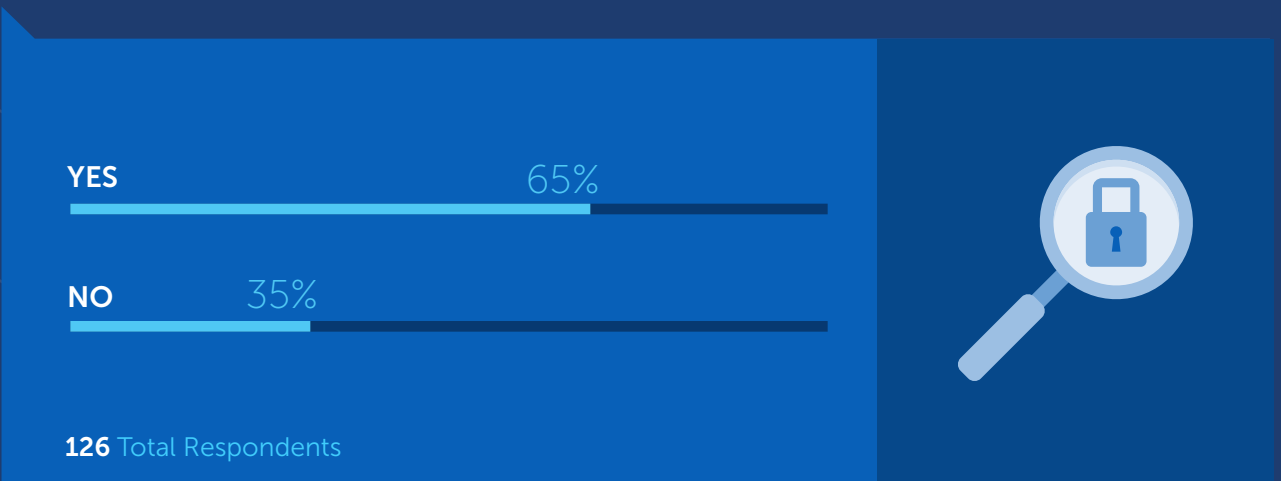

Have you ever used Microsoft SCCM to respond to a security breach?

03

Do you plan to conduct an SCCM security audit this year?

04
